Entry-level Java Backend Developer with a foundation in Core Java, object-oriented programming, data structures and algorithms, exception handling, collections, multithreading, Java I/O, and socket programming. Built Java applications involving file processing, client-server communication, TCP/IP networking, GUI development, and file transfer. Familiar with Spring Boot, REST APIs, Hibernate/JPA, MongoDB, MySQL, Git, and Postman. Seeking a Java Developer, Java Backend Developer, or Software Developer role.

Education

Savitribai Phule Pune University

Master of Computer Applications (MCA)

Savitribai Phule Pune University

Bachelor of Business Administration (Computer Application)
CGPA: 6.80

Maharashtra Board

HSC
71.33%

Maharashtra Board

SSC
89.60%

Skills

Technical Skills

Java, Python, C, C++, JavaScript, OOP, Collections Framework, Exception Handling, Multithreading, Java I/O, Socket Programming, Swing, Spring Boot, Hibernate, JPA, REST APIs, Microservices, MongoDB, MySQL, Oracle SQL, Git, GitHub, IntelliJ IDEA, VS Code, Apache Tomcat, Postman, Data Structures and Algorithms, Operating Systems, Computer Networks, System Programming, Linux, Windows, REST API development, Software debugging, Scalable application development

Soft Skills

Team collaboration

Project Experience

GUI File Packer-Unpacker

Technologies: Java, Java I/O, File Handling, Encryption

- Built a Java application to combine multiple files into a single archive and extract them when needed.
- Implemented binary file processing with FileInputStream, FileOutputStream, and buffered I/O, using a custom archive format for file metadata, names, and contents.
- Added encryption/decryption and validation for file existence, archive structure, and extraction operations.

GitHub: https://github.com/vaishn-stack/Programming/tree/main/Java_Programming/Competitive/Project/GUIFile-Packer-Unpacker

Smart Chat - Java Client-Server Chat Application

Technologies: Java, Socket Programming, TCP/IP, Multithreading, File I/O

- Developed a real-time chat application with separate client and server programs communicating over TCP/IP sockets.
- Used input/output streams and multithreading for continuous message transmission and concurrent sending/receiving.
- Added timestamp-based chat logs and connection handling with graceful termination.

GitHub: https://github.com/vaishn-stack/Programming/tree/main/Java_Programming/Competitive/Project

FTP Server-Client Application

Technologies: Java, Socket Programming, TCP/IP, Multithreading, File I/O

- Developed a client-server application for transferring files over a network using Java sockets and TCP/IP.
- Implemented file upload/download through input/output streams and added exception handling for connection, file-access, and communication errors.

GitHub: https://github.com/vaishn-stack/Programming/tree/main/Java_Programming/Competitive/Project/FTP_Server-Client_Application

Study Tracker - GUI-Based Study Management System

Technologies: Java, Swing, Collections, LocalDate, File I/O

- Created a Java Swing application to record daily study activity by date, subject, duration, and description.
- Used Java Collections and table models to organize study records; added date handling, input validation, and exception handling.

Certifications

Full Stack Java Programming - Symbiosis Skills & Professional University, Pune
08/2024 - Jan 2025
C++ Programming - Spoken Tutorial, IIT Bombay / Edu Pyramids
Dec 2025 - Present
WordPress Developer - M.V.P.'s C.M.C.S. College, Nashik
2022 - 2023

Relevant Coursework & Achievements

Coursework

Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, System Programming, Software Engineering
Solved 100+ programming problems using Java and Python.
Completed multiple academic projects in Java, backend development, networking, and system programming.
